DESMI RO-THOR – Floating suction head

The DESMI RO-THOR is a versatile and inexpensive suction head that can be deployed in a multitude of ways for recovering floating oils in lagoons, separators, pits and other hard to reach places such as oil sumps.

The advantage of the DESMI RO-THOR is made possible due to its unique design combining aluminum and rubber to make the skimmer rugged and light weight. The cover of the DESMI RO-THOR can be opened for easy cleaning and maintenance.

The DESMI RO-THOR is supplied with a rigid suction hose with suction float.

The DESMI RO-THOR can be connected to any suitable suction pump or vacuum system.

Advantages of the DESMI RO-THOR

- Floating suction head with adjustable weir
- Compact design
- Suitable for industrial lagoons, puts and drains, the DESMI RO-THOR can skim a wide variety of floating materials such as oil, scum and ash.
- Light and versatile
- Connect to any suitable suction pump or vacuum system
- A low cost and powerful skimmer system
- Unique design to ensure low maintenance and long life.

Technical Data

The DESMI RO-THOR skimmer head may be connected to any self priming suction pump or vacuum system. DESMI Ro-Clean is able to provide a variety of solutions to suite most applications.

Nameplate capacity:	22 m ³ /h
Operating draught:	10 cm
Weight:	8,5 kg
Materials:	Rubber, Aluminium
Suction connection:	2 ½"
Inlet gates:	8 x 2 cm
Inlet suction head:	92 cm
Dimensions:	87x86x10 cm
